ATG AIRPORTS

Applications:

Today's airports are complex systems demanding ultimate attention to detail. ATG Airports specializes in design, supply, manufacture, installation, and commissioning of airfield systems. ATG Airports is a main provider of airside services and products to both civil and military airfields. Providing a competent and high standard of customer service has led ATG Airports to being the UK market leader. This same success is being gained in overseas markets.

Features:

From the portfolios of a wide range of manufacturers, ATG Airports evaluates and selects the most suitable equipment for each individual airfield project.

ATG Airports design and manufacture the SONNIS™ range of Airfield Ground Lighting (AGL) Control Systems. Based on a modular expandable database, the SONNIS™ system is designed for high availability with due regard to all current relevant safety standards. The SONNIS™ system is an integral element of SMGCS Control System. When used in conjunction with lamp switching and monitoring units, the system offers individual lamp control and monitoring for runway, taxiway, and stop-bar lighting.

Our professional engineers and technicians are fully trained on AGL products and airside working. From minor modifications of existing systems to a full design brief for a green field development, our design team can provide the best appropriated solution for an AGL control system. The scope of design at ATG Airports includes AGL layouts, design and manufacture of the AGL control systems. From using conventional relays to programmable controller based designs, ATG Airports caters to a broad range of automation technologies.

The involvement of ATG Airports in an airfield project does not end with final commissioning. ATG Airports can provide extensive maintenance and service packages. These packages include preventative maintenance, regular inspection, and breakdown response contracts.

You will find that ATG Airports offers a complete solutions to increase the safety and efficiency for your airfield needs and operations.

Sold & Serviced in the United States & Canada by G. S. I. Inc.
